To the men of my life ...

– to my dad, Jacques, for his wonderful and unrelenting support throughout my years as a graduate student. Without him, I wouldn't be where I am now.

– to my dear husband Roger, for encouraging me and sharing his enthusiasm for this project every step of the way. Without him, I may never have started this book.

– to my son Vincent, for believing in his mother's dream and for representing the continuity in all things just as this book will allow dissemination of information on sow lactation for generations to come.

I love you and I thank you ...

Table of contents

1. Conditioning of the gilt for optimal reproductive performance	13
<i>D.W. Rozeboom</i>	
1.1 Introduction	13
1.2 Gilt body condition and estrous activity prior to first service	15
1.3 Gilt body condition and reproductive performance after first service	16
1.4 Conclusions	21
References	23
2. Early gestation feeding and management for optimal reproductive performance	27
<i>P. Langendijk</i>	
2.1 Introduction	27
2.2 Early gestation issues: establishment of pregnancy and embryo mortality	28
2.3 Effects of pre-mating nutrition on luteal function during early pregnancy	30
2.4 Post-mating nutrition, embryo loss and maintenance of pregnancy	31
2.5 Hormonal interventions to support the maintenance of pregnancy	39
2.6 Conclusions	39
References	40
3. Gestation group housing of sows	47
<i>H.A.M. Spoolder and H.M. Vermeer</i>	
3.1 Introduction	48
3.2 Sow social behaviour in group-housing systems	49
3.3 Types of group housing systems	59
3.4 Conclusions	65
References	66
4. Mammary development	73
<i>C. Farmer and W.L. Hurley</i>	
4.1 Introduction	73
4.2 Ontogeny of mammary development	74
4.3 Control of mammogenesis	77
4.4 Role of milk removal	80
4.5 Nutritional impact on mammary development	82
4.6 Mammary involution	84
4.7 Management strategies that can affect mammary development	87
4.8 Conclusions	87
References	89

Table of contents

5. High-Fibre feeding in gestation	95
<i>M.C. Meunier-Salaün and J.E. Bolhuis</i>	
5.1 Introduction	95
5.2 Dietary fibres: definition, sources and characteristics	96
5.3 Dietary fibres and satiety process: metabolism and physiological effects	97
5.4 Impact of dietary fibres on behavioural activity	100
5.5 Impact of dietary fibres on performance	105
5.6 Conclusions	109
Acknowledgements	110
References	110
6. Applied amino acid and energy feeding of sows	117
<i>N.L. Trottier, L.J. Johnston and C.F.M. de Lange</i>	
6.1 Introduction	118
6.2 Overarching principles	118
6.3 Energy feeding	119
6.4 Amino acid feeding	127
6.5 Feeding management	137
6.6 Conclusions	140
References	140
7. Transition feeding of sows	147
<i>P.K. Theil</i>	
7.1 Introduction	147
7.2 The importance of the transition period	148
7.3 Feeding practice of modern hyperprolific sows during the transition period	158
7.4 Recent advances	162
7.5 Future perspectives	167
References	167
8. Colostrum and milk production	173
<i>H. Quesnel, C. Farmer and P.K. Theil</i>	
8.1 Introduction	173
8.2 Definitions of colostrum, transient milk and mature milk	174
8.3 Colostrum production	174
8.4 Milk production	179
8.5 Conclusions	185
References	186

9. Composition of sow colostrum and milk	193
<i>W.L. Hurley</i>	
9.1 Introduction	193
9.2 Methodology	194
9.3 Physico-chemical properties	197
9.4 Water and total solids	197
9.5 Carbohydrates	200
9.6 Lipids	202
9.7 Proteins	205
9.8 Energy	208
9.9 Minerals	209
9.10 Vitamins	211
9.11 Cells	213
9.12 Bioactive components	215
9.13 Effects of physiological state	217
9.14 Conclusions	218
References	218
10. Housing, management and environment during farrowing and early lactation	231
<i>O.A.T. Peltoniemi and C. Oliviero</i>	
10.1 Introduction	231
10.2 Physiology of farrowing	232
10.3 Behaviour and activity	233
10.4 Successful farrowing	234
10.5 Farrowing environment	234
10.6 Duration of farrowing and influence on sow fertility	236
10.7 Effect of environment in early lactation	238
10.8 Body condition, fat metabolism and gut function at farrowing	239
10.9 Technology to predict and supervise farrowings	245
10.10 Conclusions	247
References	247
11. Piglet mortality: causes and prevention	253
<i>S.A. Edwards and E.M. Baxter</i>	
11.1 Introduction	253
11.2 Causes of mortality	254
11.3 Prevention of mortality	264
11.4 Conclusions	268
References	269

Table of contents

12. Endocrine and behavioural responses of sows to human interactions and consequences on reproductive performance	279
<i>A. Prunier and C. Tallet</i>	
12.1 Introduction	279
12.2 Handlings of suckling piglets	281
12.3 Handlings of gilts and sows	283
12.4 Impact of human-animal interactions on reproductive performances	287
12.5 Improving human-animal interactions based on a better understanding of the animals' expressions	289
12.6 Conclusions	290
References	291
13. Nursing behavior	297
<i>M. Špinka and G. Illmann</i>	
13.1 Introduction	297
13.2 Nursing during the postpartum period	298
13.3 Nursing during the established lactation	300
13.4 Functions of nursing/suckling behavior during the course of lactation	307
13.5 Conclusions	312
References	312
14. Mammary blood flow and nutrient uptake	319
<i>C. Farmer, N.L. Trottier and J.Y. Dourmad</i>	
14.1 Introduction	319
14.2 Blood flow	320
14.3 Uptakes of nutrients	324
14.4 Conclusions	330
References	331
15. Development of gut and gut-associated lymphoid tissues in piglets: role of maternal environment	335
<i>I. Le Huërou-Luron and S. Ferret-Bernard</i>	
15.1 Introduction	335
15.2 Gut and gut-associated lymphoid tissue development	336
15.3 Importance of maternal environment in driving gut and gut-associated lymphoid tissues development	344
15.4 Conclusions	348
References	349

16. Feeding various fat sources to sows: effects on immune status and performance of sows and piglets	357
<i>V. Bontempo and X.R. Jiang</i>	
16.1 Introduction	357
16.2 Use of fats and oils in sow's diets	358
16.3 Omega fatty acids (n-3 and n-6 FA)	358
16.4 Conjugated linoleic acid	365
16.5 Conclusions	370
References	370
17. Best practices in the lactating and weaned sow to optimize reproductive physiology and performance	377
<i>N.M. Soede and B. Kemp</i>	
17.1 Introduction	377
17.2 Reproductive physiology	378
17.3 Lactation: optimize follicle development at weaning	380
17.4 Weaning-to-oestrus interval: support follicle development	389
17.5 Oestrus and insemination: ensure maximal fertilisation	392
17.6 Overall conclusions	397
References	399
18. Sow health	409
<i>R.M. Friendship and T.L. O'Sullivan</i>	
18.1 Introduction	409
18.2 Management of disease in the sow population impacts the entire herd	410
18.3 Managing health of the sow	411
18.4 Overview of sow diseases	412
18.5 Infectious diseases affecting the health of sows	414
18.6 Conclusions	420
References	420
19. Sow longevity	423
<i>J.A. Calderón Díaz, M.T. Nikkilä and K. Stalder</i>	
19.1 Introduction	423
19.2 Common metrics used to evaluate sow longevity	424
19.3 Economic importance of sow longevity: effects on the sow herd	426
19.4 Why sows commonly leave the breeding herd?	429
19.5 Improving sow longevity	432
19.6 Housing effects on longevity	436
19.7 Disease effects on sow longevity	439
19.8 Seasonality effects on sow longevity	439
19.9 People/management or stockmanship skills effects on sow longevity	440
19.10 Conclusions	441
References	441
