Number of pictures: 250

Binding: Hardcover

ISBN: 978-84-92569-76-2

Editorial: Servet

PVP: 35 €

In this book we first propose the correct way to make a quick and complete necropsy which reveals the different organs and structures, offering a technique that can provide us with as much information as possible. Secondly, and directly connected with the necropsy process and maintaining both the orders and the observation plane, we show a significant number of lesions with their respective interpretations and possible relationships with one or more diseases.

A Guide to Necropsy Diagnosis in Swine Pathology
