Vitamins to VEGA!

11th. September. 2024

## VITAMIN

01

According to market feedback, Shandong Kunda Biotechnology's latest nicotinamide price has been raised to USD7230/MT this week, and currently limited orders are accepted.

## AMINO ACID

02

Valine market dynamics: Manufacturers' quotations show a weak and stable trend. The number of inquiries is relatively small recently, and users are not willing to replenish stocks. The market transaction atmosphere is weak. It is recommended to pay attention to the market transaction situation. It is expected that the price of valine may continue to be weak in the short term.

## API

03

Doxycycline hydrochloride market dynamics: This week, mainstream factories have resumed quoting, after more than two months of price and sales restrictions. It is expected that short-term demand will gradually pick up from September to October. It is speculated that subsequent prices will continue to fluctuate and adjust, please pay attention to market dynamics.

## FOOD ADDITIVE

04

The price of potassium sorbate, a preservative product, remains stable, and all manufacturers deliver goods normally. At present, the transaction price of potassium sorbate in the market is stable at around USD2.3-2.4/KG. It is expected that the price of potassium sorbate will continue to remain stable in the short term.
